

Assembly Diag of Improved Stator #27851

To Spark Plug
(Champion N3
NGK B8ES)

Black wire

Blue wire

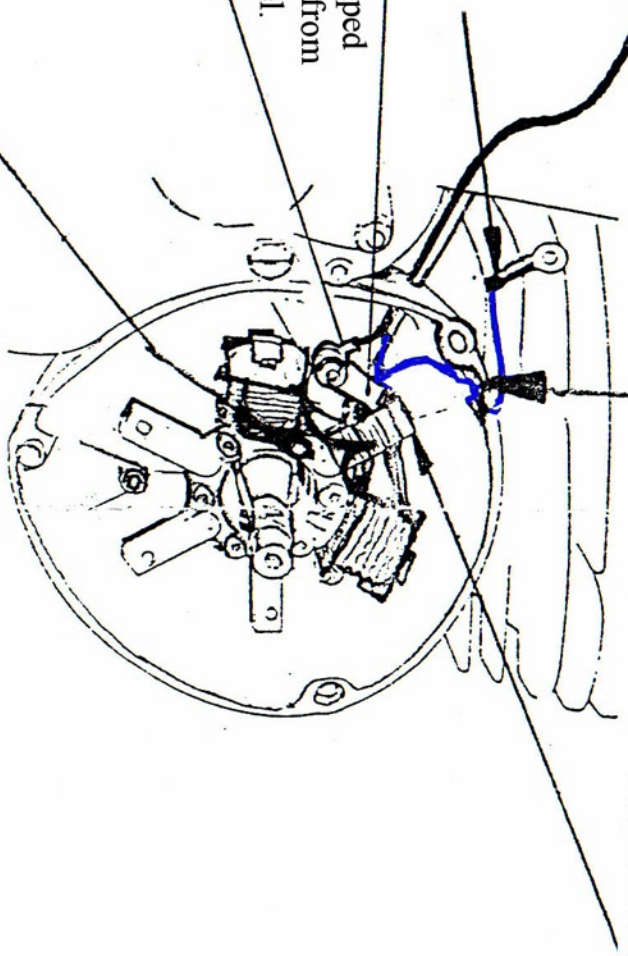

Blue wire to contact breakers

Wire clamp

Make sure the wires are clamped against the casing well away from the beack edge of the flywheel.

Earth lead
(Black wire)

Wire exit slot

Align the centre blank pole with the wire exit slot.

Earth Tag
(upwards)

Tip:

Stormer flywheels tend to come loose and destroy the crankshaft and the flywheel's taper. Use high strength Loc-Tite on the taper, and torque the flywheel nut to 95lb/ft.
