

AJS Adjustable Control Lever Set

These levers are designed to fit the following AJS models:

Cadwell 125

'71 Desert Scrambler 125

Tempest Roadster 125

Tempest Scrambler 125

(will not fit Clubman 125)

Skill level required 7/10 If you are not competent with mechanical tasks, please ask your AJS Dealer to fit these levers for you. Ask your dealer for a quote first.

Remove the original levers and replace with these adjustable levers. Adjust the clutch lever to have 5mm free play at the ball end (see your Owner's Manual for further information)
Check the correct function of the brakes before riding.

IMPORTANT

Adjust the clutch safety switch as necessary. To adjust the switch, unscrew screw A, push the clutch switch in or out as necessary and re tighten screw A. Incorrect adjustment could lead to the clutch safety switch not functioning correctly. This could either cause the motorcycle not to run or the side stand cut out switch not function correctly.
